

## Initial Project Planning

|               |                                                        |
|---------------|--------------------------------------------------------|
| Date          | 18-09-2026                                             |
| Team ID       | MCA                                                    |
| Project Name  | Smartphone Usage Digital Addiction Wellbeing Analytics |
| Maximum Marks | 4 Marks                                                |

| Sprint   | Functional Requirement (Epic) | User Story Number | User Story / Task                                                                                                                               | Story Points | Priority | Team Members | Sprint Start Date | Sprint End Date |
|----------|-------------------------------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|--------------|----------|--------------|-------------------|-----------------|
| Sprint-1 | Setup                         | USN-1             | As a analyst, I can understand problem - why 5308 of 7500 users are addicted (70.77%)                                                           | 2            | High     | Member 1     | 01-09-2026        | 02-09-2026      |
| Sprint-1 | Data Import                   | USN-2             | As a analyst, I can load data 7500 users into Power BI with fields like age, gender, screen time                                                | 2            | High     | Member 2     | 01-09-2026        | 03-09-2026      |
| Sprint-1 | Data Clean                    | USN-3             | As a analyst, I can clean data and make Age Group (Under 20, 20-29 49%, 30-39)                                                                  | 2            | Medium   | Member 1     | 02-09-2026        | 04-09-2026      |
| Sprint-2 | KPI Cards                     | USN-4             | As a user, I can see 11 cards - 7500 total, 5308 addicted, 26.57 age, 7.5 hrs daily, 9.24 weekend, 3.27 social, 6.74 sleep, 134 notif, 98 opens | 3            | High     | Member 1     | 05-09-2026        | 07-09-2026      |

|          |                   |        |                                                                                                                                                                        |   |        |          |            |            |
|----------|-------------------|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|--------|----------|------------|------------|
| Sprint-2 | Report 1          | USN-5  | As a user, I can see Report 1 KPI dashboard page 1 of 5                                                                                                                | 1 | High   | Member 2 | 06-09-2026 | 07-09-2026 |
| Sprint-3 | Charts            | USN-6  | As a user, I can see Report 2 with 6 charts - gender 7.6 vs 7.4, addiction level Moderate 38%, Donut 7.5K, scatter phone vs sleep, age group, gaming 15K vs social 24K | 3 | High   | Member 1 | 09-09-2026 | 11-09-2026 |
| Sprint-3 | Dashboard 1       | USN-7  | As a user, I can see Dashboard1 - 4 cards 7500,5308,9.24, 6.74 and 6 charts - weekend addicted 10.2 vs non 6.9, age 20-29 49%, app opens by stress same 97-98          | 3 | High   | Member 2 | 10-09-2026 | 13-09-2026 |
| Sprint-3 | Filters           | USN-8  | As a user, I can use filters for gender, age, addiction level                                                                                                          | 1 | Medium | Member 1 | 12-09-2026 | 13-09-2026 |
| Sprint-4 | Problem Statement | USN-9  | As a owner, I can make PS-1 and PS-2 - young adult 20-29 with 7.5 hrs daily and 10.2 weekend because 134 notif                                                         | 2 | High   | Member 2 | 14-09-2026 | 15-09-2026 |
| Sprint-4 | Insights          | USN-10 | As a team, I can find strongest factor is weekend gap 3.3 hrs, then social media, then notifications                                                                   | 2 | High   | Member 1 | 14-09-2026 | 16-09-2026 |

|          |               |        |                                                                      |   |        |          |            |            |
|----------|---------------|--------|----------------------------------------------------------------------|---|--------|----------|------------|------------|
| Sprint-4 | GitHub README | USN-11 | As a developer, I can make simple README for GitHub with screenshots | 1 | Medium | Member 1 | 16-09-2026 | 17-09-2026 |
|----------|---------------|--------|----------------------------------------------------------------------|---|--------|----------|------------|------------|

Total 4 Sprints, 11 User Stories, 22 Story Points.

Sprint-1: Setup and data .

Sprint-2: KPI cards Report1 .

Sprint-3: Charts Report2 and Dashboard1.

Sprint-4: Problem statement PS-1 PS-2 and README .
